

Revitalize

BIOSTIMULANTS

TECH SHEET

A next-generation liquid soil activator designed to awaken soil life, accelerate organic matter breakdown, and unlock essential nutrients.

PRODUCT FEATURES

- Accelerated digestion of organic matter supplying nitrogen.
- Mineralisation of phosphorous, potassium and trace elements.
- Synthesis of Vitamin B12 through cobalt.
- Enhanced fertiliser uptake.
- Generates CO₂, which opens the soil, stimulates root growth, improves drainage and reduces tillage requirements.
- Disperses toxic levels of elements on soil colloids.
- Crop residues are recycled and beneficial soil microflora are re-established promoting better soil health.

FUNCTION

Revitalize triggers a chain reaction of beneficial fungi and soil microbial growth. This produces nutrients and substrates that create humus and humic acids, which chelate with, sequester and store nutrients in the soil. This encourages root growth and promotes stronger, healthier plants.

Revitalize improves the availability of phosphorus and potassium whilst stimulating root growth and moisture uptake. Revitalize also quickly recycles crop residue, releasing nutrients and humus to improve soil structure.

ANALYSIS

FERMENTED METABOLITES FROM:

Pseudomonas fluorescens

Bacillus licheniformis

Bacillus amyloliquefaciens

Bacillus mucilaginous

PRODUCT CHARACTERISTICS

COLOUR	S.G.	pH
Opaque Light Orange	1.02 - 1.06	3.6 - 4.4

SIZES

20 Litre, 200 Litre, 1,000 Litre
